- Renowned and proven KERN-LIEBERS quality for all needle bed elements
- OEM co-operation means we meet the toughest requirements and provide optimum consulting service
- High flexibility with relation to new product characteristics and the continual improvement process
- Perfect surface integrity
- Spring elements with an unusually long service life

The KERN-LIEBERS product range

Needles · Selectors · Couplings · Sinkers · Needle bed bars · Miscellaneous machine parts · Assemblies

Large product range for all important flat bed knitting machines. Due to close co-operation with leading machine manufacturers, KERN-LIEBERS products meet OEM specifications exactly.

Optimum matching of parts and needles. Years of experience with fineblanked and stamped parts coupled with

the expertise of the KERN-LIEBERS Springs division paved the way for expansion of our product range into the flat bed sector.

Our established range of parts is well rounded off with a large needle range.
