Single Jersey needles

Quality needles for popular Asian Single Jersey machines

KERN-LIEBERS Textile has expanded its product range with additional 28 GG Single Jersey needles.

For many decades now, KERN-LIEBERS Textile has been a competent and reliable partner for textile machine engineering. This is also extremely beneficial to quality-oriented knitting mills, as the close relationship to machine engineering guarantees a consistently high level of quality for end users.

Our comprehensive product range of various loop-forming parts has now been supplemented with the most popular Single Jersey needles, further expanding our customer service and making KERN-LIEBERS Textile today a full-range supplier. Our many years of experience in stamping, hardening and polishing technology guarantee high-end quality in the production of needles, essential in particular in the production of Single Jersey products. Uniform stitch structures in the finest yarns are obligatory with needles from KERN-LIEBERS Textile.

The qualities that have contributed to the well-established good image of KERN-LIEBERS Textile for decades have now also been demonstrated for needle production. Uncompromising high-end quality for the steadily growing demands of the global textile market.

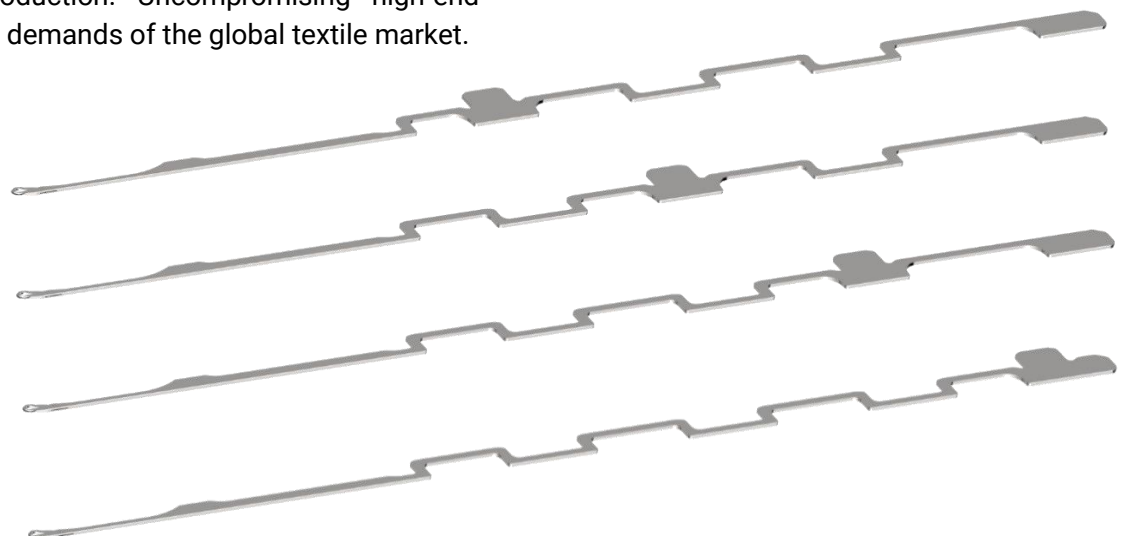

Single Jersey needles of the highest quality
