

KERN-LIEBERS

TEXTILE

Pinned products

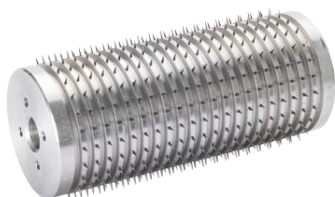

Pinned products - the all-rounders!

Pinned products are used in a wide variety of applications for conveying, tensioning, cutting, perforating, fixing, tearing, sorting, brushing or dividing.

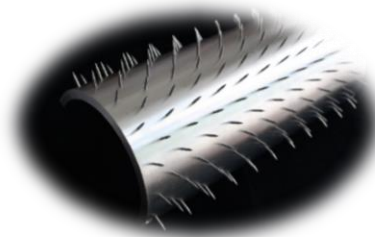

The technological know-how of KERN-LIEBERS Textile is based on the experience of more than 300 years and is reflected today in a wide range of services:

- Comprehensive advice on the development of products in close cooperation with customers
- Support in the material selection of the needle carrier
- Special rounding technologies for optimization

What has been the high image of KERN-LIEBERS Textile for decades has also been the basis for the production of pinned products. Uncompromising high-end quality for the constantly growing demands in various industries worldwide.

Perforating roller with axle
