

Compound needles

KERN-LIEBERS Textile complements its product range with additional compound needles.

For many decades, the KERN-LIEBERS Textile Group has been known as a reliable partner for warp knitting machine manufacturers, and highly respected for our uncompromising quality.

Many years of experience in the development of highly sophisticated components for OEM customers have made KERN-LIEBERS Textile the undisputed quality leader in products for the warp knitting industry. This big advantage also constituted a key element in the development of technical compound needles.

Compound needles from KERN-LIEBERS Textile are therefore a logical addition to the already leading product range of various components. They enable KERN-LIEBERS Textiles to be a full-range supplier for the warp knitting industry. All components and needles are perfectly adapted to each other, providing a solution that is indispensable for the comprehensive production of high-end knitted products worldwide.

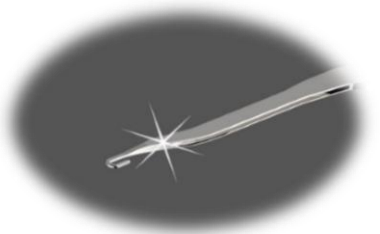

Most popular needles
Spec.43.41/103K0002
Spec.47.50/102K0001
